

Why Barrier Films is an industry leader

Barrier Films, maker of high-barrier co-extruded films for food packaging, keeps ideas as fresh as the food that their material is designed to protect thanks to the pioneering spirit of president Bill Wright. It's no surprise that his search for cutting-edge technology to expand production led him to groundbreaking, innovative designs of Windmoeller & Hoelscher and their 7-layer VAREX® system.

W&H VAREX® technology offers the unique advantage of the OPTIFIL® P-2, the industry's only automatic die control. The patented NOSTIC® oscillating haul-off system for tacky films produces scratch-free product and a non-contact thickness gauge guarantees consistent quality.

Add in multiple component gravimetric control systems and a FILMATIC® W dual turret winder, and you'll understand Bill Wright's confidence in staking his firm's future expansion on W&H.

OPTIFIL® P-2, the industry's only automatic die
