

ISO Poly Films

Committed to Excellence

Since its inception 12 years ago, ISO Poly Films, now a Sigma Plastics Group company, has grown to be a leader in the manufacturing of quality blown films.

ISO Poly's passion for excellence and success in developing quality performance films is undeniable. When economic uncertainty sent the industry reeling, ISO Poly kept a firm foothold, focused on growth and installed three new VAREX lines from W&H. That's staying power.

"Our co-extrusion and barrier film lines from W&H are vital to our growth and provide the latest technology to manufacture advanced films with superior quality and complex structures for our customers," says Jon McClure, President and COO.

Alfred Teo, Chairman and CEO of the Sigma Plastics Group, adds, "We have over 20 multi-layer extrusion lines from W&H in our group. I'm extremely happy with the quality of the machinery and service from W&H and look forward to a long-term relationship."

At W&H, we're proud to be partnered with ISO Poly Films and the Sigma Plastics Group.
