

Nina Plastics blossoms in Orlando.

Of course, Orlando is famous for family fun. But in the plastics business, it's known as home to Nina Plastics, for 20 years an ever-expanding leader in premium quality flex packaging products for the lawn and garden, produce, and automotive industries, among others.

Privately owned, Nina Plastics boasts a complete in-house production facility, with extrusion, printing and converting capacities.

Never a company to stand still, Nina recently added two new W&H purchases to expand its horizons: a NOVOFLEX® and a VAREX® OPTIFIL®P2.

The 52" wide 8-color gearless NOVOFLEX® is W&H's direct drive press with infinitely variable repeat lengths, designed for use with fast change sleeves and consistently high quality at maximum speeds.

The 87" wide 3-layer VAREX® OPTIFIL® P2 blown film extrusion line with the new FILMATIC® T dual turret winder is the first step in Nina's aggressive plan to expand high quality film production significantly over the next few years.

"We've known about W&H's reputation for high-quality machinery for years, and we think now is the time to add W&H technology. We're thrilled about our future cooperation," says Nina's President Satish Sharma.

So are we, Mr. Sharma.

Satish Sharma, President & Jim Snell, V.P. Operations
