

How Tufco Technologies of Green Bay found the fast lane to growth

When their clientele wanted better print quality and faster service, customer-driven Tufco Technologies accelerated into the fast lane with an ASTRAFLEX® press from Windmoeller & Hoelscher.

ASTRAFLEX allows Tufco, a major provider of integrated contract services to more than 1,000 market leaders, to upgrade customer service and build market share. The 64"-wide, 8-color flexographic press increases production capacity with speeds up to 1500 fpm, and improves quality with fine graphic line-screens.

The ASTRAFLEX can print both paper and film. Its PORTALIFT® robotics automatically change plates and rolls and TURBOCLEAN® automatic wash-up simplifies clean-ups. With ASTRAFLEX on its team, Tufco Technologies is in the driver's seat.

President Lou LeCalsey and VP Michele Cherney say their ASTRAFLEX® press is key to Tufco Technologies' future success.
