

How World Class Films lives up to its name.

Less than ten years after the Shemesh brothers, Ron and Yoram, founded World Class Films, the company is a leading supplier of high-quality specialty films.

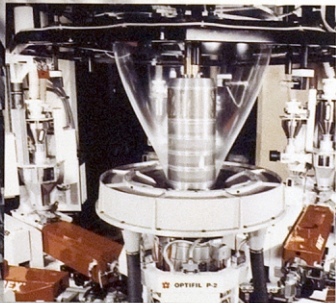

Now, with two W&H VAREX® five-layer blown film systems, they're producing the highest quality high-barrier exotic films in the world.

The high-tech, modular VAREX® with OPTIFIL® P-2 automatic die produces virtually flawless films.

The NOSTIC® air-cushioned turning bars eliminate scratching caused by bar/film contact. And the MODULE K-Beta's non-contact thickness gauge and the innovative rotary stabilizing cage prevent marks and blemishes.

It all adds up to quality that lives up to the World Class name.

If you want to produce the best exotic films in the world, you'll want the best system in the world: the cutting-edge, ultra-flexible VAREX®. Get the complete story from Windmoeller & Hoelscher.

OPTIFIL® P-2, the industry's only automatic die
