

RETROFIT SOLUTIONS FOR BLOWN- AND CAST FILM LINES

WINDMÖLLER & HÖLSCHER

FILMATIC-Winders

Easy processing with a smart design: With a film winder from W&H's comprehensive **FILMATIC** range, you can offer perfect, straight-edged rolls from start to finish.

W&H-Delivery of Retrofits:

- Winders from the FILMATIC series for blown- and cast film lines

W&H-Scope of Delivery of Upgrades:

- Winders with center drive and gap winding
- Treater systems
- Spreader roll systems
- Edge Trim and bleed trim removal system
- Center Drive
- Deionization units to prevent static buildup
- Newest generation of winding shafts
- Roll handling system (crane and shaft extractor for winding shafts)
- Safety package

Filmatic winders and components are assembled and installed by W&H service technicians.

Advantages:

- Extension of blown film product line
- Optimal winding quality, perfect for subsequent processing
- Improved handling with the new roll handling system
- Integrated control system
- Easy to use technology
- Safety features and equipment

**Installation including training:
approx. 5 days (depending on
requirements)**
